THE OUTLOOK.

Kaleidoscopic Election Figures.

Perplexing Political Permutations.

Information on Which to Base Moneyed Opinions.

Lists of Republican, Democratic, Doubtful and Semi-Doubtful States.

NEW YORK, Nov. 5.—[Associated Press.] The presidential election of 1892 is unique in being the first since the war in which so many doubtful states are admittedly at issue between the great political parties. The advent of the Peoples Party into National politics has constituted a great element of doubt in the present contest. The doubtful states are Alabama, Colorado, Kansas, Nevada, North and South Dakota, Nebraska, Wyoming and Idaho. To the list are added the old time doubtful states, New York, Indiana, New Jersey, Connecticut, Montana and West Virginia.

The presidential college this year will consist of 444 members. The states admitted to be Democratic are the following: Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Mississippi, Michigan, Missouri, North Carolina, Tennessee, Texas and Virginia, with a total of 137 electoral votes. The states admitted to be Republican are California, Illinois, Iowa, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, Pennsylvania, Ohio, Rhode Island, Vermont, Washington and Wisconsin, total 172. The fifteen doubtful states enumerated at the beginning will cast an electoral vote of 125.

Nevada with her three electoral votes is practically conceded to the Peoples Party. Of the doubtful states, Democrats make the loudest claims to Alabama, New Jersey and West Virginia, swelling the total to 174. Republicans express the greatest confidence in carrying Colorado, South Dakota, Idaho and Nebraska, which would swell their total to 191. Admitting the claims of the two old parties and conceding Nevada to Weaver, the very doubtful states remain New York, Indiana, Connecticut, North Dakota, Wyoming and Montana. These states have a total of seventy-six votes, and of these seventy-six votes the Democrats must gain forty-nine in order to succeed, and the Republicans must secure thirty-two. While on these figures the Republicans appear to have the advantage, this presumption is not borne out when it is remembered that the carrying of Kansas, North Dakota and Wyoming by the Peoples party would insure to Demo-

cratic advantage by tending to render a choice in the electoral college impossible, thus throwing the election into a Democratic house of representatives, where Cleveland would surely triumph.

JONES FOR HARRISON.

The Nevada Senator Denies Having Declared for Weaver.

CARSON, Nev., Nov. 5.—[Associated Press.] A dispatch was sent by Governor Colcord to United States Senator Jones, Hoffman house, N. Y., stating that dispatches reported Senator Jones as having declared for Weaver against Harrison, and asking if it was true. Senator Jones replied today as follows: "Dispatches are not correct. While I regret exceedingly to differ from my old friends, I am compelled by candor and constitution to say that under the present conditions I believe the interests of Nevada will be best subserved by the success of the Harrison electors."

Oregon Republicans Confident.

PORTLAND, Nov. 5.—Oregon votes on Tuesday for president and vice-president. The principal issue in the campaign is the tariff and up to a few days ago none of the parties in the field have put forth any special efforts, but the attempted fusion of the Democrats with the Peoples Party within the week has caused Republicans to exert themselves to bring out a full vote. Republicans claim they will have a plurality of at least 10,000 in the state and that they will elect all four electors, notwithstanding the fact that the Democrats have withdrawn one of their electors in favor of the Peoples Party. The Democrats do not expect to carry the state, but they say they are certain to elect Pierce whom they have endorsed.

ALL IN LINE.

(Continued from first page.)

cast, regardless of party lines. He is opposed by a small element of Republicans on a personal fight, but this dissatisfaction is insignificant when compared with the Democratic vote which he commands. His majority will reach 275, and Cluff will come within twenty-five votes of this figure. Under ordinary circumstances Norris would poll a good vote, but he is extremely unpopular in this section, owing to his antagonism of home interests, and will fall far short of his party strength.

Pinal County.

FLORENCE, Ariz., Nov. 5.—[Special.] Our estimate of Stewart's majority is seventy-five. Cluff's will be nearly as great. The Republican legislative ticket will undoubtedly win, and most of the county ticket.

FAST OYSTER OPENERS.

Workmen in New York City Who Take Oysters Out of Their Shells.

The crack oyster openers of New York can easily hold their own against the rest of the world as "lightning operators," as they are called.

One of the veterans is Dick Balmer, who has opened 9,000 oysters in a day of twelve hours, and he can now average 7,500 in a day of twelve or thirteen hours' work.

Mike Foley, who may well be termed a lightning operator, and is now in his fifties, has opened as many as 9,500 oysters in one day, and on ordinary days, if he pushes himself, he can easily get away with 8,000 oysters. Of course the oysters opened are large and small, just as they come, as if they were all small and round the opening could be done much more rapidly.

John Lahey is good for an average of 8,000 a day, and so is an opener known among the oystermen as "Deaf George."

In a trial of speed in opening 500 oysters John Lahey probably cannot be beaten. To open oysters rapidly of course requires a great deal of experience in handling them, but there also seems to be a knack about it that every oysterman cannot acquire. Some men, for instance, can only open 4,000 oysters a day and they will not go much above that after years of work in this line.

The twenty-seven men employed by Alex Frazer on the North river will average 5,000 oysters a day, which is a much higher average than is reached by the majority of the crews around New York. These men also can turn out, when required, 150,000 oysters a day in all, which is 15,000 oysters above the average of 5,000 a man. There are very few oyster scoops in the market can equal this average from week to week. It must also be considered that on some days work begins at 5 o'clock in the morning and on others at 6 or 8 o'clock.

There was an oyster opening match about a year ago between Mike Foley and Jack Gillon. The match was to decide which man was the quicker at opening 1,000 oysters. Gillon won in 57 minutes, beating his opponent by only seven oysters. Foley has opened 11,200 oysters at one sitting.

Dick Balmer has appeared in sixteen oyster opening matches and lost only two of them. Most of the contests were over the opening of 100 oysters. At one time Balmer opened 100 oysters in 4 minutes and 22 seconds, which is now the best "straight knife" record. Balmer has also opened 1,000 oysters in 55 minutes. The two matches in which he was defeated he lost to John Gillon. The first match was best two out of three records in opening 100 oysters, but owing to a dispute Balmer retired from the contest, leaving the match to Gillon. At the second match Balmer was beaten by eight oysters.

Among the lightning operators on William Foster's scow the most conspicuous undoubtedly is "Black Frank," as Frank Barrett, who is as white a man as any other white man in this country, is dubbed by his associates. Mr. Barrett

has spent a good many years in the south, and from his association there in a business way with the darkies he came to be called "Black Frank."—New York News.

Discarded India Rubber Utilized.

It is a matter of common knowledge that India rubber goods even of the highest quality are perishable. Although not subject to any great wear and tear the time comes when the rubber loses its elasticity and becomes soft and rotten. Hitherto such perished rubber has represented a waste material for which no use could be found, but by a process recently invented the perished rubber can be made, it is said, once more serviceable.

By incorporating the waste rubber with certain hydrocarbons and with a proportion of Trinidad asphalt, by adding to the mixture certain vegetable oils and submitting the product to heat, there is produced a substance to which the name of "blandyte" has been given. It can be made hard and dense or soft and pliable by modifying certain parts of the process, and it seems to be applicable to most of the various purposes for which pure rubber is used.—St. Louis Globe-Democrat.

The Cutaway Coat.

The cutaway frock coat may be worn at any time during the day, and is really the most useful all around garment in the vocabulary. The man in the black cutaway of dull finish cloth is dressed for any emergency that may arise during the hours of the day. It is suitable for the afternoon tea and for the morning stroll. It has been worn with excellent effect with the top hat at the noon wedding—indeed its efficacy and becomingness is so apparent that many of the more conservative swells have been deterred through their fealty to this garment of the more distinguished but trying lines of the long tailed double breasted frock.—Clothing and Furnisher.

Real Estate For Sale.

REAL ESTATE BARGAINS—That the stranger in the city who is seeking a bargain in real estate, if not suited after having examined all other bargains, would do well, no doubt, to call on me and let me show him: 2½ acres, improved, close in, \$2,500 cash. 7½ acres on transportation line and Main street, \$800 terms. 30 acres on suburbs, improved, right for subdivision, \$1,000 terms. 150 acres, close in, and nothing to equal it for subdivision, price \$125 per acre; terms. A 5 and 10 acre tract too cheap to mention. 15 choice lots in Boston addition, on car line, \$400 each cash; adjacent lots held at \$500 and upwards. 32 lots on car line, 1 block west of Capitol plaza and depot, only \$250 cash. One business lot, right where you would want it, and away down for all cash. My prices are much under real values, but I must make a quick turn for want of funds. Address Owner, P. O. box 142, city.

The average length of life is greater in Norway than in any other country on the globe. This is attributed to the fact that the temperature is cool and uniform throughout the year.

A big patron of the shoe market is Allen Milton Browning, of Huntington, W. Va. He has led six wives to the altar and is the father of sixty-seven children.

The municipality of Vienna has 600 clocks, regulated from four main centers, so that standard time is assured in all parts of the city.

The highest mortality in the police department of New York city last year was among the surgeons, three of whom died during the year. Only two roughmen and two sergeants died, the total number of deaths being forty-eight. One reason why the death rate in the department is so low is that the officers are retired after twenty years' service at their option, or for age.

Information Wanted. "Do birds think?" asks a writer in opening an article. If they do, we should like to know what a canary thinks of a woman who stands up on a chair and talks baby through the bars of the cage.—New York Recorder.
